ODFW Fishing Report (as of July 2d)

- Water levels remain low, but the cooler weather will prompt fish to be a little more active.
- Warmwater fish like bass, bluegill and perch stay active throughout the summer. Consider using weedless hooks and rigs in lakes with lots of aquatic vegetation (which also stays active throughout the summer).
- Steelhead anglers should keep an eye on the Siletz, where fishing should continue to improve throughout the month. Also the Sandy River (below the mouth of Cedar Creek), and throughout the South Santiam.
- Now is a great time to hike into one of area's high lakes. Water stays cooler in these higher elevations and fishing should be good until the snow flies this fall.
- Bass fishing on the upper Willamette between Salem and Albany can be excellent.
- A few spring Chinook are still being caught in the lower Willamette.
- Bass and other warmwater fishing in the Willamette and stillwater venues such as Wilsonville Pond and Woodburn Pond could be a good bet, as these locations do not get a lot of fishing pressure and can, especially during periods of warm weather, produce some lunker crappie and largemouth bass – something to consider as other options become more scarce.

Oregon Take A Soldier Fishing Events:

Fishing Notices:

ACTION NOTICE - Recreational Ocean Salmon
07/03/2019

June 28, 2019 ACTION NOTICE - Recreational Ocean Salmon: Oregon Dept. of Fish and Wildlife has adopted special regulations at the mouth of Nehalem Bay that mimic the inside restrictions. From July 1 through Sept. 15 no more than one wild (non clipped) Chinook Salmon is allowed in aggregate from the special terminal area at the mouth of Nehalem Bay, Nehalem River, and Nehalem Bay. More details on the regulations and a description of the terminal area can be found at [Nehalem_Ocean_Terminal_Area_2019](#)

ACTION NOTICE - Commercial Troll Salmon
07/03/2019

July 3, 2019 ACTION NOTICE – Commercial Troll Salmon: NOAA Fisheries in consultation with the Oregon Department of Fish and Wildlife, California Dept. of Fish and Wildlife, the Pacific Fishery Management Council, and fishery representatives has taken the following in-season action in the commercial troll salmon fishery in the area from Humbug Mt. to the Oregon/California Border:

ACTIONS TAKEN:

The July Chinook salmon quota for the area from Humbug Mt. to the OR/CA Border is increased by 1,995 Chinook to a revised quota of 4,495 Chinook

The weekly landing and possession limit in the area from Humbug Mt. to the OR/CA Border is increased to 125 Chinook per vessel per landing week (Thursday-Wednesday) beginning 12:01 AM July 4, 2019

RATIONALE: Estimated June landings totaled 71 Chinook out of the quota of 3,200 Chinook, leaving 3,129 Chinook on the quota. When the remaining Chinook from the June quota were rolled forward to July on an impact neutral basis for all management stocks, it resulted in a net increase in the transferred quota at a rate of approximately 0.64 July equivalents for each June fish being transferred, and resulted in a net increase of 1,995 Chinook available to the July quota. The weekly landing limit per vessel will be increased from 50 Chinook per landing week (Thursday through Wednesday) to 125 Chinook beginning July 4 in order to provide a better opportunity for the troll fishery to access their allocation. The revised landing limit will remain in effect for the remainder of the 2019 season unless adjusted by future management action.

Participating vessels are reminded of the mandatory reporting of landings within one hour of delivery or prior to transport away from the port of landing. Reports may be made by phone to (541)867-0300 ext. 252 or by email to kmzor.trollreport@state.or.us. Report should include the vessel name and documentation number, the number of salmon being by species, the port of landing, the name of the fish buyer to whom the fish are being sold, and the
